

Transport of Pharma Products and Vaccines by Air

Time and temperature-sensitive pharmaceutical and healthcare products including vaccines — require specialized handling every step of the way.

This 1.5-hour e-learning course covers what you need to know about packaging, documentation, process controls, monitoring, and storage to ensure safe, compliant transport in air freight.

More than 36 Million new aviation related jobs will be needed by 2034

ARE YOU INTERESTED?

 **Course duration**
1.5 hours of study

 **Exam period**
www.iata.org/training-exams

 **IATA Certificate awarded**
upon successful completion
of the final examination.

WHAT YOU WILL LEARN?

Upon completing this course, you will have the skills to:

- Recognize differences in pharmaceutical products and their main characteristics
- Understand regulatory requirements for handling time-/temperature-sensitive pharma products
- Describe roles & responsibilities of stakeholders in the air-freight supply chain, and key process milestones

WHO SHOULD ATTEND?

- Cargo agents & freight forwarders
- Airline cargo operations staff
- Customer service, reservations, & operations personnel involved in live animal shipments
- Airline handlers and ground staff handling live animals for acceptance / transport

KEY TOPICS

- Commodity types & characteristics; temperature range & distribution requirements
- Product packaging (active and passive systems)
- Pharma-specific regulations & air freight rules
- Documentation & labelling for time- and temperature-sensitive products
- Storage and handling procedures for pharma products
